

GUÍA DE EJECUCIÓN - GITHUB ACTIONS (PLAYWRIGHT)

1. Ingresar al repositorio en GitHub.

Dirigirse a la pestaña 'Actions' del repositorio.

The screenshot shows a GitHub repository page for 'orangehrm-automation'. The 'Actions' tab is highlighted with a red box. The page displays a list of recent actions, all of which are related to 'Playwright Tests'. The actions are as follows:

Action	Description	Time Ago
Ronaldoa1698 add rename readme allure	feature dashboard allure	1 hour ago
.github/workflows	rename tag	2 hours ago
.gitignore	feature dashboard allure	1 hour ago
README.md	add rename readme allure	1 hour ago
package.json	feature dashboard allure	2 hours ago
playwright.config.ts	feature dashboard allure	2 hours ago
playwright.env	feature setup initial automation	2 hours ago
tsconfig.json	feature setup initial automation	2 hours ago

Below the actions, there is a section titled 'Guía de Uso del Framework Playwright'.

2. Seleccionar el workflow 'Playwright Tests'.

Hacer clic en 'Run workflow', seleccionar el tag del escenario a ejecutar y luego confirmar la ejecución.

Luego seleccionamos el tag a ejecutar, lo hara de forma automatica luego de hacer click en run flow

4 workflow runs

This workflow has a `workflow_dispatch` event trigger.

- Playwright Tests** (green checkmark) - Playwright Tests #4: Manually run by Ronaldoa1698 (main)
- Playwright Tests** (red X) - Playwright Tests #3: Manually run by Ronaldoa1698 (main)
- Playwright Tests** (red X) - Playwright Tests #2: Manually run by Ronaldoa1698 (main)
- Playwright Tests** (green checkmark) - Playwright Tests #1: Manually run by Ronaldoa1698 (main)

Use workflow from Branch: main

Tag del escenario a ejecutar*

- ✓ @retoSeek
- @loginSuccess
- @loginFailure
- @filterUserSuccess
- @addUserAdmin
- @emptyFields

Sugiero ejecutar el primer tag, ejecutara todos los escenarios

3. Visualizar el reporte Allure.

Una vez finalizada la ejecución, dirigirse a la URL publicada en GitHub Pages para visualizar el dashboard completo de ejecución (Allure Report).

Luego que la ejecucion termina, dirigirse a la ruta que adjunte en el readme en la parte final, esto es el dashboard de ejecucion
